

2021 MassBioEd Life Sciences Apprenticeship Program

What Makes This Program Special...

- Our recruitment focuses on work-ready people who demonstrate a real passion for a career in the life sciences.
- Employers have the final say in accepting candidates into the program.
- The curriculum is designed in close partnership with our employer partners and our educational providers.
- We incorporate dedicated soft skills classes, along with Biotech 101 to give them a broad overview of the industry.
- We employ a continuous improvement mindset.

Quotes - Summer 2021

"I think this program is a great way of getting ready for the world of biomanufacturing and ensuring that we thrive. I am more grateful and appreciative than I could ever put into words."

- *Biomanufacturing Apprentice*

"In all my years of teaching this group includes some of the brightest, most motivated students I've ever had the pleasure of working with."

- *Biomanufacturing Professor*

"MassBioEd has de-risked our recruitment and onboarding procedures. We know what we are getting, and greatly appreciate being able to work with such a trusted partner."

- *Biomanufacturing Employer*

2021 MassBioEd Life Sciences Apprenticeship Program Financial Impact

30% of our apprentices were unemployed prior to joining our program.

For those who had been employed, their average income will increase 42% by the end of their apprenticeship year.

Their apprenticeship employment will include company provided health insurance, paid time off, paid holidays, and other benefits many have never received before.
