

Accelerated Leadership Program

Description

The Accelerated Leadership Program provides leaders with critical leadership competencies to accelerate their performance in leading life sciences companies. Specifically, the course will focus on leaders' capabilities in the areas of strategic planning and decision making, influence, collaboration, and executive presence. The skills associated with the program, when mastered, can enable significant and strategic impact for a leader and their contributions to an organization.

Format

This interactive remote course occurs over four days, 3.5 hours per day. The course will remain remote until safe to return in person.
