Ethics in Biopharma

Description

This course looks at various case studies of ethical conundrums throughout the industry, with historical context and a deep dive into modern-day issues. Participants will gain skills in identifying, navigating, and circumventing current and potential future ethical challenges. The course will start with a discussion on the concept of ethics, include recent examples of ethical breaches, and end with an overview of steps to take to avoid future ethical dilemmas in the workplace. This course is intended to be an interactive, discussion-driven seminar open to all experience levels.

Format

Online: Course will occur over three days, 2.5 hours per day.
In-Person: Course will be formatted as a full-day workshop.
